EXPERIENCE

Product owner

Unipark

August 2023 – ongoing Vilnius, Lithuania

- Led the creation of a new parking enforcement back-office solution, integrating AI technologies (e.g., machine learning algorithms) to streamline and enhance operational efficiency, resulting in a 30% increase in processing speed.
- Facilitated the integration of AI into Unipark’s products, enabling scalable and adaptable solutions for diverse international markets and enhancing the company’s global footprint by 40%.
- Directed the development of a mobile application for physical enforcement, improving on-ground operations by 25% and enabling real-time data accessibility for 20+ enforcement officers.
- Played a key role in the expansion of Unipark’s products to 4+ countries and municipalities, integrating AI technologies to adapt solutions to various regulatory and operational environments, resulting in a 20% increase in market adoption.
- Initiated and led a pioneering project focused on people-less enforcement, utilizing advanced technologies (e.g., automated surveillance and data processing) to automate enforcement processes, reducing the need for human intervention by 50%.

Product manager

Intempt technologies

April 2022 – August 2023 Vilnius, Lithuania

- Developed product roadmaps, prioritizing features based on business goals and customer feedback.
- Collaborated with design, engineering, marketing, and sales teams, achieving a 15% faster time-to-market for product beta-launches.
- Managed the product lifecycle, using data-driven decisions to improve adoption rates by 15%.
- Communicated product vision and strategy to stakeholders, securing \$500K in additional funding.
- Implemented a new pricing strategy for a product line.
- Worked with top data scientists to apply a novel statistical inference method, increasing investor and customer satisfaction by 25%.
